

Cloud-Managed Video Management Anywhere, Anytime.

Built for Users.™

Apps for every operating system. **Cloud-enabled.**

DW Spectrum® Pro supports all major operating systems with the ability to link any system to DW Cloud™ for fast, reliable remote access.

Automated. Intuitive. **Built for Users.**

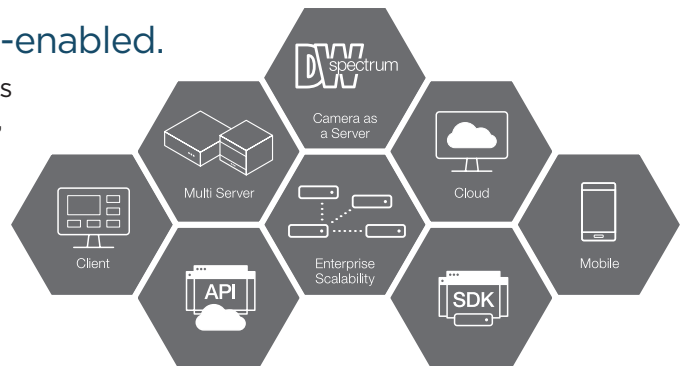

Installs in seconds configures in minutes. Instantly usable for novices, operators, integrators, or developers.

Auto-discover devices from hundreds of manufacturers.

Discover and manage thousands of compatible video, audio and I/O devices. Set up a new system or replace any existing VMS in minutes.

Open for developers. **Integrate anything.**

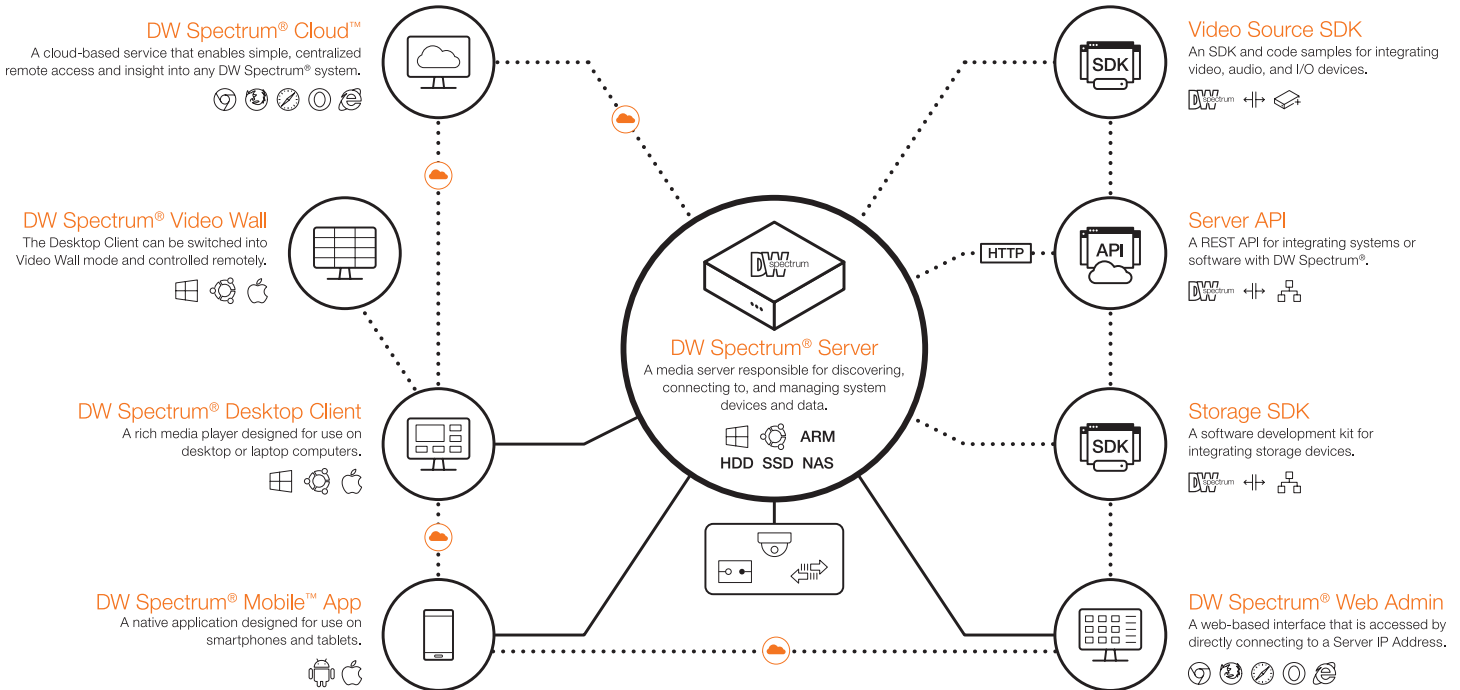

With an open Restful API, a suite of SDKs, and integrator-friendly tools like a built-in API generator, DW Spectrum users can quickly integrate any 3rd party device or system.

Simple. Reliable. Customizable.

DW Spectrum® Pro Video Management Services is a cloud- managed, cutting-edge approach to surveillance that addresses the primary challenges of managing enterprise-level video while offering actionable, data-driven monitoring at the lowest total cost of deployment on the market.

1 Open architecture/cross-platform.

Open architecture

- With mobile, desktop and DW Cloud™, connect from anywhere to share access instantly.
- Support of thousands of devices, including cameras, encoders and I/O modules from leading manufacturers.
- Support cameras at every resolution.
- Built-in API allowing managed video to be accessed and reviewed by any willing 3rd party device.

Cross-platform

- DW Spectrum's recording engine runs on Windows® and Linux® Operating Systems.
- Client software is Windows, Linux, or Mac® compatible.
- Mobile apps are iOS® and Android® compatible.
- Web client compatible with Google Chrome®, Firefox®, Safari® and Internet Explorer®.

2 Easy to use and powerful

Highly refined GUI

Viewing video

- Seamless transitions.
- Customizable camera layouts.
- Zoom, create regions of interest and enhance images.

Searching video

- Fastest video search in the industry.
- Users can bookmark specific video segments.

Downloading video

- Multiple download options.
- Storage backup.

System programming

- Intelligent high-definition multi-streaming video management with no user programming required.
- Server and system programming from a single interface.

Advanced features

- Interactive alarms, events/notifications, and universal fisheye de-warping are available from a single interface.
- External alarm events can be delivered right from the IP camera or via network I/O modules.

3 Advanced features are standard.

- Custom User Role Management: create custom roles and share groups of hardware and layouts.
- Multi-Server and Centralized Management
- Health Monitor: provides real-time insight into camera and server status.
- Video Storage Analytic: insight into storage requirements each camera is using in real-time and forecasts the impact of additional storage.
- Minimize Video Recording Loss: includes failover to protect video recordings from hardware failures and network interruptions.
- LDAP/Active Directory integration for ecosystem-wide user management is standard.
- Video Wall users can create and remotely manage remote monitors with just a few clicks.

4 Future-proof infrastructure

Designed to grow with your needs, DW Spectrum Pro features a hive architecture that ensures your surveillance network is ready to expand, accommodating increasing data and device requirements seamlessly.

5 Cloud connectivity

Use the power of DW Cloud to access, manage, and control your surveillance system from anywhere. With cloud-based flexibility, ensure secure, remote connectivity for real-time surveillance without geographical limitations.

6 AI-driven solution.

Bring any camera or IoT device from a constant-growing database of 3rd party technology partners to ensure a versatile and flexible surveillance system that meets your unique needs.

You choose your devices.

Enhance your surveillance system and get more from your investment with a solution that helps you make data-driven decisions in all aspects of your business.

HOW IT WORKS

Smartphone or tablet. Smart video.

DW Spectrum Mobile for iOS and Android smartphones and tablets provides fast, dependable mobile access to any DW Spectrum system.

View, playback and capture still images from a surveillance system on your smartphone and tablet.

Connect. View. Search. Control.

DW Spectrum Mobile - with a custom-developed media player - is a low-latency, user-friendly mobile application for iOS and Android devices that allows users to connect to, view, search, and control IP cameras over wifi or data networks.

SUPPORTED OPERATING SYSTEM:

CONNECT	VIEW	SEARCH	CONTROL

QUICK SYSTEM SWITCH: Quickly switch between multiple DW Spectrum IPVMS systems

DW Spectrum Developer Tools

DW Spectrum's Toolkit for developers includes everything you need to bring your vision to life with APIs and SDKs for a truly customizable solution.

HTTP Server API

An open, comprehensively documented RESTful HTTP Server API. The DW Spectrum API provides the ability to access nearly every feature available in the system's thick client.

Metadata SDK

DW Spectrum's Metadata SDK is used to create Plugins of 3rd party applications that can be installed on the DW Spectrum Server.

Video Source SDK

Integrate live and recorded video, alarm, sensor and audio sources. The video SDK enabled the integration of any video source into the DW Spectrum system architecture.

Storage SDK

The DW Spectrum Storage SDK enabled the integration of 3rd party storage solutions, both hardware and software-based.

Technology partners and 3rd party integration

DW Spectrum offers extensive equipment integration, supporting thousands of devices, including cameras, encoders and I/O modules from leading manufacturers. Its refined user interface guarantees seamless surveillance management. And its cross-platform variability also allows users to access and manage surveillance data from anywhere, at any time.
